Model  
**C100**

# CIC HEARING AID

Imported chips

Long battery life

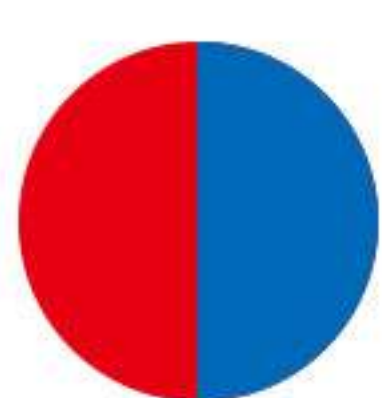

Convenient to carry

- Imported chip
- Dock & travel case
- Easy to use and clean
- Soft and clear sound
- Universal for left and right ears
- Manual switch
- Imported chip
- Manual volume control
- Battery life  $\geq 10$  Hours

# CIC HEARING AID

Imported chips

USB Charging base

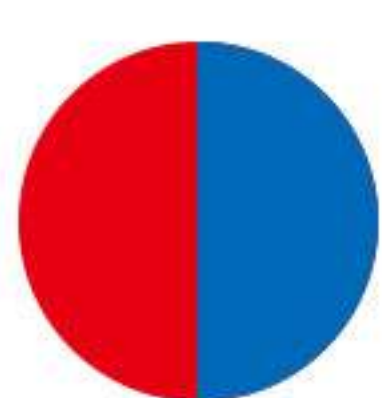

Noise reduction

- Imported chip
- Dock & travel case
- Battery life  $\geq 15$  Hours
- Easy to use and clean
- Charging time: 5-6 Hours
- Manual switch
- Charging in the case
- Soft and clear sound
- Manual volume control
- Universal for left and right ears

# BTE HEARING AID

Imported chips

USB Charging base

Anti-drying

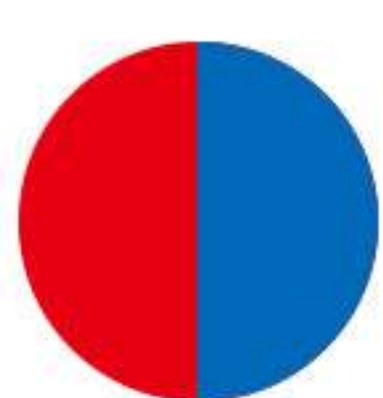

Long battery life

- Imported chip
- Battery life  $\geq 40$  Hours
- Universal for left and right ears
- High power, greater hearing loss range
- Charge case can recharge hearing aid 6-7 times
- VC Trimmer
- Charge case with type-C interface
- High fidelity sound amplifier circuit
- Advanced digital noise reduction function
- Magnetic charging method Lithium battery charging

C300

# CIC HEARING AID

Imported  
chips

Magnetic  
charging

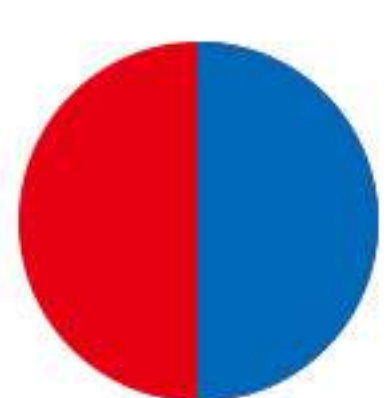

Long  
battery life

- Dock & travel case
- Soft and clear sound
- Manual volume control
- Charging time: 2.5-3Hours
- Charging: magnetic contact
- Drying hearing aid while charging
- Imported digital chip
- Easy to use and clean
- Battery life  $\geq 25$  Hours
- Automatically turn on & off
- Universal for left and right ears

Magnetic  
charging

Long  
battery life

Noise  
reduction

- 3 built-in programs
- Low Battery warning
- Magnetic charging method
- 6 channels 12 frequency bands
- Push button for volume & programs switch
- Charge case can recharge the hearing aid 6-7 times
- Automatic feedback compression DFS system
- Battery life  $\geq 35$  Hours
- Smart noise reduction
- Fully digital signal processing
- Intelligent noise reduction system
- Automatic feedback compression DFS system
- Charge case with type-C interface & wireless charging function

# BTE HEARING AID

Magnetic  
charging

Noise  
reduction

- Low battery warning
- Higher hearing loss range
- Devices Automatic switch
- Separate program switch button
- Digital 8 channels and 12 frequency bands
- The open fit thin tube can be changed to ear hooks
- Low power consumption
- Super howling suppression
- Charging case built-in battery
- Advanced noise reduction system
- Built-in 3 programs and 8 Volume levels
- Charge case with type-C interface & wireless charging function

Beige

Model  
**R86**

# BTE HEARING AID

Magnetic  
charging

Rechargeable

- Manual switch
- Program/volume memory
- Separate program switch button
- Charging case built-in battery
- Digital 6 channels and 12 frequency bands
- Magnetic charging design make it charge easily
- Low power consumption
- Super howling suppression
- Advanced noise reduction system
- Built-in 3 programs and 8 Volume levels
- Open fit thin tube can be changed to BTE ear hooks
- The open fit thin tube can be changed to ear hooks

Beige

connection

Magnetic  
charging

Noise  
reduction

- Low battery warning
- Program/volume memory
- Super howling suppression
- Volume up and down rocker button
- Digital 6 channels and 12 frequency bands
- The open fit is compatible with traditional BTE ear hooks
- Charge case with type-C interface & wireless charging function
- Low power consumption
- Program switch button
- Charging case built-in battery
- Advanced noise reduction function
- Built-in 4 programs and 8 Volume levels
- Bluetooth video direct connect (music/TV/calling)
