Light is state	Battery capacity of charging box
	0-25%
	26-50%
	51-75%
	75-100%

## Multi-function button

To avoid complex operation, hearing aid designed a multi-function key, according to press the multi-function button in different time, can realize the different operation of hearing aids.

Press mode	Function
Click multi-function key	Switching volume
Long press the multi-function button for 2 seconds	Switch program
Long press the multi-function button for 3 seconds	power on
Long press the multi-function button for 6 seconds	power off

# Hearing aid model introduction

Hearing aid has three programs, long press the multi-functional key for 2 seconds to switch hearing aid program, according to different prompt sound recognition of the current program.

Cue tone	Program
"beep"	Quiet mode
"beep,beep"	Noise reduction mode 1
"beep,beep,beep"	Noise reduction mode 2

Program applicable environment

Program	Applicable environment
Quiet mode	Suitable for quieter environment
Noise reduction mode 1	Suitable for noisy environment
Noise reduction mode 2	Suitable for outdoor environment

# Wearing a hearing aid

Step 1: Pinch the receiver tightly with your hand and gently insert the earplug into the ear canal.

Step 2: Hang the hearing aid behind the ear and adjust the position of the hearing aid to a comfortable position.

## Replace hearing aid earplugs

Inappropriate earplugs may cause howling and swelling, so we recommend that you replace them with appropriate earplugs.

Step 1: Turn the edge of the earplug upside down, hold the hearing aid receiver with one hand and pull the earplug down with the other.

Step 2: Select the earplug that fits your ear canal, align the receiver and insert it.

Note: After installing the earplugs, gently pull the earplugs to ensure that the earplugs are firmly installed and not easy to fall off.

## Replace cerumen strainer

Inappropriate earplugs may cause the hearing aid to whistle and the ear canal to feel swollen, so we recommend that you choose the right earplugs for replacement.

Step 1: Remove earplugs first. See "Replacing Hearing aid Earplugs".

Step 2: Align the detachable end of the cerumen strainer kit with the hearing aid outlet hole and insert.

Step 3: Pull out the ceruminous strainer kit. Check to see if you have taken out the old ceruminous strainer. If not, repeat step 1.

Step 4: Insert the end of the cerumen strainer kit with the new cerumen strainer into the hearing aid sound hole.

Step 5: Pull out the ceruminous strainer kit and check whether the ceruminous strainer has been installed.

## Cleaning and maintenance

### 1. Routine maintenance

It is important to keep your equipment clean and dry. To avoid potential damage from excessive humidity or sweating, a drying kit is also recommended.

### 2. Care and maintenance

- Store in a safe area away from children and pets when not in use.
- Do not place hearing aids or charging sockets in hot areas such as stoves or in direct sunlight.
- Do not leave the device in a damp place, such as a bathroom, for long periods of time.
- Be careful not to poke the microphone hole with any sharp object to avoid damage.
- Do not disassemble yourself or attempt any repair. Doing so will void your warranty.

### 3. Clean

- Clean the receiver with a brush.

- Clean with brush the microphone.

## Troubleshooting guide

Malfunction	Possible reasons for	The Solution

	The battery of the charging case is exhausted	Make sure the charging case is charging
Hearing aid into the charging box, the hearing aid charging indicator light is not bright	Bad contact of charging contact	Insert the hearing aid back into the charging dock
	The hearing aid was placed out of position	Check to see if your hearing aid is upside down

## Matters needing attention

- Do not use hearing aids if you have any of the following conditions:
  - Congenital atresia external or malformation of any part of the ear canal.
  - Erratic deafness, where the degree of hearing loss often fluctuates.
  - Persistent headache, dizziness, earache, tinnitus or other symptoms that are not suitable for adaptation.
  - Sudden hearing loss within the last 3 months; Rapid progressive deafness.
  - Unilateral hearing loss or other acute ear disease.
  - Fluid accumulation in the ear or frequent insertion (unbearable).
  - Central deafness (central nervous system) or non-organic deafness.
  - Patients with acute otitis externa and otitis media.
  - Patients with acute and chronic suppurative otitis media (in the suppurative infection stage).
  - Patients who are allergic to this product material.
- Hearing aid daily precautions
  - Do not immerse hearing aid in any liquid.
  - Remove hearing aid before swimming or bathing.

- After swimming or washing, wait until your ear canal is dry before wearing your hearing aid.
- After taking off the hearing aid at night, it should be placed in the box with desiccant as far as possible to avoid light, high temperature and high humidity environment.
- The outer surface of the hearing aid should be kept clean, and wax from the earbuds should be removed daily.
- When you are not using your hearing aid, charge the product regularly to avoid damaging the battery.

## FCC warning statement

Changes or modifications that are not explicitly approved by the compliant party may invalidate the user's authority to operate the equipment. This device has been tested to comply with Part 15 of the FCC Rules. These restrictions are intended to provide reasonable protection against harmful interference in residential installations. This equipment generates and radiates radio frequency energy, which may cause harmful interference with radio communications if not installed and used according to the instructions. However, there is no guarantee that interference will not occur in a particular installation. If the device does cause harmful interference with radio or television reception, which can be determined by turning the device off and on, the user is encouraged to try to correct the interference by doing one or more of the following: complying with the limitations of a Class B digital device:

- Reposition or reposition the receiving antenna.
- Increase the distance between device and receiver.
- Connect the device to a different socket from the circuit connected to the receiver.
- Consult with distributors or experienced radio/TV technicians.
